

	Corrugated Plastic	Corrugated Cardboard/Paper	Molded Plastic
Project Development/Lead Time	Fast and inexpensive	Fast and inexpensive	Long lead times on new products and very expensive
Durability and Strength	Lightweight, resistant to tears and not easily punctured	Tears and punctures easily	Heavy and may crack when impacted
Cost	Long life cycle, lasts multiple years. Cost-effective solution that provides ongoing savings	Short life span. High total cost associated with reordering and product turnover	Long life cycle, lasts multiple years. Significant ongoing savings.
Cleanliness	No dust or residue	Can be dusty for product and environment	No dust or residue
Waste/environmental	Reusable and recyclable to minimize waste	Ongoing waste along with disposal costs	Reusable and recyclable to minimize waste
Work Flow	Long-term reusability reduces downtime	Broken containers, reordering causes work interruptions	Broken containers, reordering causes work interruptions
Moisture	Waterproof, unaffected by most chemical agents	Easily broken down or destroyed	Waterproof, unaffected by most chemical agents
UV/Outdoor usage	Long-term durability, all weather performance	Very limited applications	Long-term durability, outside performance limited in below zero temperatures
Colors	Variety of colors available or customized	Brown or white	Limited colors available
